## SCIENCE KNOWLEDGE

### What is Stem Cell (SC) ?

- .The ability to self-renewing.
- .Cells that have the potential to differentiate.
- .Under certain conditions, it can differentiate into a variety of functional cells.

### Mesenchymal Stem Cells (MSCs)

- .Ability to self-replicate and differentiate.
- .It has the characteristic of directional migration to damaged tissue.
- .The ability to regulate the immune response.
- .Wide application and better effect, especially in cosmetic for anti-aging.

NEW  
BREAKTHROUGH

# CELL TECHNOLOGY

## CELL CULTURE MEDIA

Cell culture media is a rich culture medium in a variety of cytokines and other active substances extracted from human umbilical cord cells under specific conditions through precise technology

## EACH BOTTLE OF CELL CULTURE MEDIUM CONTAINS A VARIETY OF CYTOKINES

Type I Collagen

KGF

HGF

FGF

PDGF

VEGF

TGF- $\beta$ 1

IL-6

## CELL CULTURE MEDIA

5g\*20 pcs

- STEM CELL LABORATORY
- 100,000 LEVEL GMP PRODUCTION WORKSHOP
- CUTTING-EDGE TECHNOLOGY RELEASES A VARIETY OF EFFECTIVE CYTOKINES.
- 100 LEVEL EXPERIMENTAL CONSOLE.
- CULTIVATE MESENCHYMAL CELLS WITHIN 10 GENERATIONS ACCURATELY.
- "REPAIRING, REGENERATION, AND CONSOLIDATION" TO ACHIEVE SKIN REJUVENATION YOUTHFUL STATE.

## THE CELL CULTURE MEDIA IS COME FROM MESENCHYMAL CELLS

- ◎ Low Immunogenicity
- ◎ Stable and Safe Genes
- ◎ Strong Proliferation Ability and Multiple Usage

## STRONG ANTI-AGING EFFECT OF CELL CULTURE MEDIA

- ◎ Activate the skin immune system and accelerate the elimination of "Zombie" cells
- ◎ Regulate collagen and elastic fiber repair and regeneration
- ◎ Speed up cell regeneration and repair damaged cells
